

# Statistical Database User Guide

Our statistical database <u>tilastot.tela.fi</u> contains data on the breakdown of pension insurers' investment assets, as well as quarterly information on the breakdown of investments and returns of the largest pension providers. The database offers the possibility to extract, save and further edit the desired data, for example, in Excel.

This guide uses a search example to illustrate use of the database. The information requested is **"Total investment assets of pension insurance companies in 2010-2020"**.

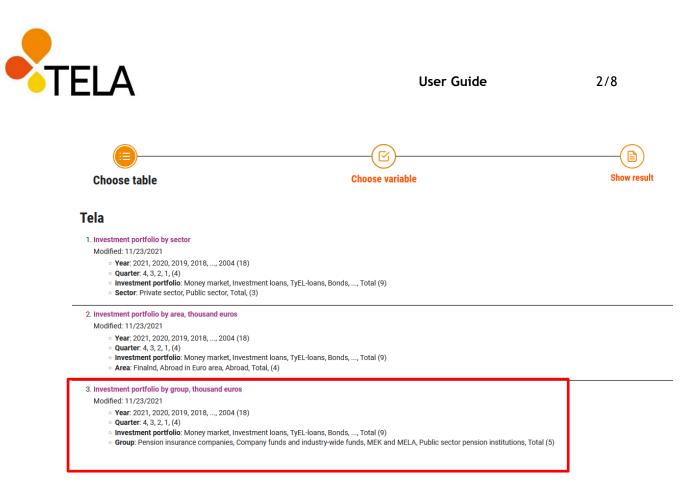

### Stage 1: Select a table

In the main menu, select the title "Time series on investment assets".

### Stage 2: Select the data

The information "Total investment assets in 2010-2020" is available in all selectable tables. In this example, we are searching specifically for investment asset data on pension insurance companies. For this reason, the lowest heading "Investment portfolio by group" is selected from among the alternatives.

The table shows the date when the information was updated under the heading ("Modified on November 23<sup>rd</sup> 2021" in the illustration above).

## Stage 3 Select more detailed information

At least one selection must be made in each checkbox of the table. For the quarterly selection only, the default quarter is 4, i.e. the end-of-year situation, if no selection is made. For each selection, all selectable data can be selected (Select all) or cleared (Deselect all).

Multiple variables can be selected in different ways, depending on whether the data selected are consecutive or chosen from here and there on the list.

To select consecutive data from the list:

- highlight the consecutive data with the mouse, or
- press the Shift key and click the first and last value in the desired list.

To select data from here and there on the list, keep the Ctrl key pressed while selecting the information desired.

In the example search "Total investment assets of pension insurance companies in 2010-2020", the following selections are made in the checkboxes:

- In the Year section, select the years 2010-2020.
- The quarter selected is 4.

- The investment type selected is "Total".
- The group selected is "Total".

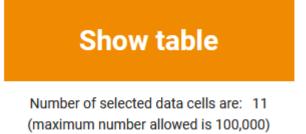

### Investment portfolio by group, thousand euros

V About table		
Year Mandatory *	Quarter  Select all  Deselect all  Selected 1 of total 4  Optional variable  4  3  2  1	Mandatory * Investment portfolio Select all Search Beginning of word Selected 1 of total 9 Bonds Real estate Hedge funds Other equity Listed shares Total V
Croup Mandatory *		

## Stage 4: Perform a search

After making the selections described above, click the "Show table" button to perform a database search.

Presentation on screen is limited to 1,000 rows and 30 columns

## Stage 5 Review the search results

The desired table appears on the screen, looking like this:

			Total
4	Total	2020	221,598,866
		2019	215,547,847
		2018	193,120,824
		2017	199,524,902
		2016	188,585,230
		2015	180,871,498
		2014	172,521,368
		2013	162,182,816
		2012	149,552,026
		2011	136,269,849
		2010	138,170,642

Investment portfolio by group, thousand euros by Quarter, Investment portfolio, Year and Group

#### Information about the table

Click the "About table" heading to see when the table was updated and other background information.

## Saving the data

The data retrieved for the table can be saved in several formats. Save alternatives appear in the drop-down menu by selecting "Save table as".

l	Save table as 💙	Tat
1	Save table as	^
	PX-file	
1	Excel workbook (xml)	
	Excel workbook (xml) with code and text	
	Tab delimited with heading	
1	Tab delimited without heading	
	Comma delimited with heading	
1	Comma delimited without heading	
ł	Space delimited with heading	
ŀ	Space delimited without heading	
	Semicolon delimited with heading	
	Semicolon delimited without heading	
	Html file (htm)	
	Relational file (txt)

	.lson file (ison)	×

The extraction can also be saved under "Save your query" by selecting the alternative "Same as shown on screen" under **Save the result as**. A direct link to the extracted information is then revealed by clicking the key "Save extraction". The link can be used to return to the same extraction later. The link can also be forwarded by using the "Send as e-mail" key.

Save your query			
It is not possible to update the query since there is no defined time variable in this table. Update options What do you want to do with your saved query if the tables are updated with new time periods Update the query with a fixed starting time point and the new time periods Update the query with a rolling start time point and an unchanged number of time periods On't update the query, but show the same time periods as selected Save the result as (mandatory):			
Same as shown on screen V			
Cancel Finish			
Save your query			
Update alternatives: Don't update the query, but show the same time periods as selected Format: Same as shown on screen			
You can return to the saved query by clicking on this link
